

Public Information Meeting

St Marys Cement – Permit to Take Water

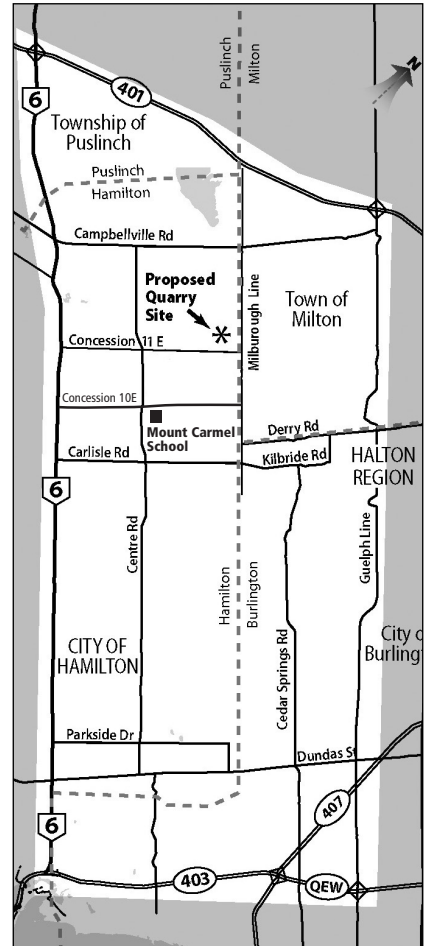

Please join us for a Public Information Meeting

St Marys Cement understands that our application for a Permit to Take Water (PTTW) to conduct pumping tests is an ongoing concern for local residents.

To respond to your questions and concerns regarding water issues related to our quarry application, St Marys will be hosting a Public Information Meeting at Our Lady of Mount Carmel Catholic Elementary School at 7:30 p.m. on Wednesday April 16.

Presentations will include representatives from St Marys, the Ministry of Environment and other invited stakeholders. A formal question and answer session will follow the presentations.

This Public Information Meeting is part of our ongoing communication effort to keep the community informed about our application.

Date: Wednesday, April 16, 2008
Presentation: 7:30 p.m.
Location: Our Lady of Mount Carmel Catholic Elementary School,
1624 Centre Road, Carlisle ON
